Biotechnologist interested in environment and industry. I consider myself involved and high worker person. I have a big cooperation capacity and the ability of work in a team, as well as I have enthusiasm for learning.

## COMPLEMENTARY FORMATION

**2017 EUALGAE training school (Almería, Spain).**

Microalgae processes: From lab to industrial scale.

**2017 Chromatography course (Agilent Technology).**

## ACADEMIC FORMATION

**2015- 2017 Master degree in Industrial and environmental Biotechnology.**

Complutense University of Madrid.

Final Project: Isolation and characterization of microalgae cell wall and their influence in anaerobic digestion process.

**2011-2015 Biotechnology Degree.**

University of Cádiz.

Final Project: Hypertermophilic temperature influence in biohydrogen production through anaerobic digestion of wastes.

## EXPERIENCE

**2017-currently PhD Student. Biotechnological processes unit IMDEA Energy.**

ACMIBIO project: Anaerobic digestates as culture media for yeasts's growth for energy purposes.

**2016-2017 Technician. Biotechnological processes Unit IMDEA Energy.**

MICROALBAC project: Microalgae-bacteria consortium integration in urban wastewater treatment plants.

## CAPABILITIES/SKILLS

### LANGUAGES:

- ▶ **Spanish:** Native language
- ▶ **English:** Intermediate level (B2)
- ▶ **French:** Basic competences (A1)

### COMUNICATION SKILLS:

User level: Power Point, Prezi, video and audio editing

### COMPUTER ABILITIES:

- ▶ **Microsoft office:** Word, Excel, PowerPoint, Outlook.
- ▶ **Mathematic Software:** Maxima, Matlab.
- ▶ **Molecular Biology Software:** Oligo explorer, Genomicus, Pathway.
- ▶ **Data base:** NCBI, Blast, Scientific Direct, Web of Science.

### PERSONAL QUALITIES:

Dynamic, proactive, working alone or as a part of a team, liable, availability to travel
